Faith, Lawrence, this table Lawrence attached works. We only ask you add a column "Project Environmental Impact" - High, Medium and Low. All this demonstrates that they completed environmental screening. This would finish up our comments on Chapter 2. Let me know if that's unclear.

Have a great Thanksgiving.

Ted

Subject: Items from Today's call

1) Attached is a potential replacement table for Table 2-3 per the Chapter 2 comments item.

2) RE: APE Maps

The distributed maps are the ones that were included with the APE concurrence by SHPD in 2007 (attached letters). We have agreed to add another historic district boundary and to add a graphical line around the historical architecture APE boundary because the current maps do not show it well if printed on a black and white printer; however, the original map set included the extensions for review of potential cumulative effects, but were eliminated in consultation with the SHPD prior to determination of eligibility. We can place a note on the cover sheet to this effect.

3) HHF Comment Matrix

We are updating the matrix to be consistent with the discussion held last Friday that clarified some of the answers. I believe HHF heard that their comments were reviewed and considered, but are shopping for a different set of responses.

4) Ko'olani Condominium

We met with the Condo owners about a month ago and answered their questions about the project. One desire expressed by several residents was to have the alignment moved away from their high-end building and nearer to an affordable housing building. I will prepare a point-by-point response before tomorrow on their comments. They were concerned about noise; however, all of their units are air conditioned and none of the individual units have an outdoor use area. Their shared outdoor-use lanai is located on the opposite side of the building;

therefore, there are no noise sensitive uses per FTA criteria at the building.
